## CAREER OBJECTIVE

---

Passionate Computer Science student with strong interest in Java Full Stack Development. Currently learning Spring Boot for backend development and seeking an entry-level opportunity to contribute my technical skills, learn from real-world projects, and grow professionally while adding value to the organization.

## EDUCATION

---

**B.E (Computer Science and Engineering)**, R.M.K. Engineering College 2023 – 2027  
CGPA: 8.64

**Class 12th**, H.N.U.C. Higher Secondary School 2022 – 2023  
Percentage: 94.16%

**Class 10th**, H.N.U.C. Higher Secondary School 2020 – 2021  
Percentage: 100% (All Pass)

## SKILLS

---

|                              |                                                                                    |
|------------------------------|------------------------------------------------------------------------------------|
| <b>Programming Languages</b> | Java (Intermediate), C (Basics)                                                    |
| <b>Web Technologies</b>      | HTML, Tailwind CSS, JavaScript                                                     |
| <b>Tools</b>                 | Visual Studio Code, Figma                                                          |
| <b>Core Concepts</b>         | OOPS, DBMS, Data Structures, CN                                                    |
| <b>Soft Skills</b>           | Communication, Adaptability & Learning, Problem-Solving, Teamwork, Time Management |

## INTERNSHIP

---

### Infosys Springboard – Full Stack Development

*Team of 5 — Role: Frontend Developer*

Contributed as the frontend developer for the team project **HireHelper**, gaining hands-on experience with HTML, Tailwind CSS, and JavaScript, and collaborating effectively within a team environment.

## PROJECTS

---

### HireHelper – Task Hiring & Helping Platform

Technologies: HTML, Tailwind CSS, JavaScript, Node.js, Express.js, MongoDB

Role: Frontend Developer

Developed a web application where users can post tasks and also help others complete tasks. Built responsive frontend and integrated with backend APIs.

### Drone-Assisted IoT-Based Emergency Alert System

Technologies: ESP8266, LoRa SX1278, GPS Neo6M, Adafruit IO Cloud, Drone Technology

Designed an IoT-based emergency alert system for rescue operations in remote areas. Implemented GPS tracking and long-range LoRa communication. Integrated drone as an aerial relay and search unit.

## ACHIEVEMENTS

---

Secured **1st Prize** in the Intra-Department Technical Competition for the project **Drone-Assisted IoT-Based Emergency Alert System**.
